Fourteen varieties of certified organic olives are hand-picked and processed under granite stones at the family’s mill. Ancient groves, a Roman masher and a first cold press make exceptional flavors concentrated and marked by hints of green apple, almond, and burnt orange with a smooth and peppery finish.

VINAGRES DE YEMA

VINAGRES DE YEMA

PEDRO XIMÉNEZ VINEGAR
The high sugar content of the white Spanish grape, Pedro Ximénez, balanced by the vinegar’s acidity, yields a dense, rich finishing or “sipping” vinegar that can also be a “sweet & sour” addition to salads, meats and soups. Made in the time-honored tradition of solera aging through a series of barrels called criaderas. When the solera, the barrel with the oldest vinegar, is tapped, it is never fully drained. The remaining vinegar is blended with vinegar from the next younger criadera and so on until the youngest is topped off with fermentated must. This wine vinegar has a 6% acidity.

Case size: Six 500mL bottles 90400
**VINEGARS**

**MARQUÉS DE VALDUEZA RED WINE VINEGAR**
In 2007, the Marqués de Valdueza Estate set aside 3000 liters of their wine (a blend of Cabernet Sauvignon, Merlot, and Syrah) to begin the fermentation process using the traditional Orleans method. The process begins in stainless steel tanks and then proceeds into four-year-old French oak barrels for 20 months. 2012 marked the first year of this vinegar’s release! Complements the Marqués de Valdueza wines and EVOO. This vinegar is honey colored with intense and complex aromas of vanilla, fennel, and licorice spice. It finishes with a hint of almond. 9% acidity makes it perfect for finishing a variety of cold and hot dishes.

**VINAGRES DE YEMA TIERRA VIEJA DOP**
This organic vinegar is made using the traditional solera-cridera method of aging and contains solera that is 5 years old. This youthful vinegar is light golden in color and will not dampen the colors of vegetables or protein it is paired with. At 7% acidity, the flavor is bright but has a complexity on the finish that comes from aging in oak barrels.

*“We’re not just producing and selling food. I believe a consistent, underrated—but nevertheless rewarding—part of our work is to create an awareness and a culture for good food.”*

**PO TOSINI PROSCIUTTO DI PARMA**

10 Best Prosciutto di Parma 2012 by Slow Food Italy

Family-owned and operated for four generations, Pio Tosini is one of the most credible and sought-after producers of Parma ham by the Italian domestic market. They have been in operation for over 80 years and we have been their honored importer since their introduction into the U.S. in 1995. This delectable prosciutto, sweet to the palate, is cured in the town of Langhirano, Italy, and bears the honorable mark of the Consorzio del Prosciutto di Parma. The Consorzio sets minimum standards to be able to qualify for this mark and Pio Tosini far exceeds each standard.

Their whole process starts with strict selection of the highest possible quality raw pork, each piece hand-salted and cured for longer than the Consorzio requires. Instead of 13 months, they cure a minimum of 17 months. We import legs 20 to 25 months aged. Why? The extra time allows for slow and even salt penetration and assures the sweetness of the hams.

Made using four simple ingredients: fresh pork, salt, air and time. Each ham that is imported to the US is handpicked by the two owners—Nicola or Giovanni, the founder’s (Ferrante Tosini) great-grandsons. At Pio Tosini, each ham is trimmed and de-boned by hand, the final step to personally assure the product we import is top quality.

**ARTURO SÁNCHEZ**

In the late nineteenth century, Arturo Sánchez began his dried meat trade in the Candelario Mountains. Today, the fourth generation of his family creates a one-of-a-kind Iberian product.

Pigs acorn-fed for a full two seasons—double montanera (twice the standard practice) — distinguish Arturo Sánchez Ibérico Bellota from the rest. Born and bred in the best dehesa fields to the north of Seville to the south of Extremadura, the pigs roam freely, resulting in more oxygenated meat and better fat infiltration. Two acorn feeding seasons means more fully developed muscle and bone mass, with healthy fat infiltration in the muscle, providing an unmatched flavor and a level of oleic acid surpassed only by olive oil.

Each ham is hung manually, one by one, in drying sheds and cellars ensuring the wind can circulate around the entire ham. As each individual piece evolves, it is moved among cellars, year-round, in a combination that creates a special character. Windows are opened or closed depending on time of day, season, temperature and humidity. Time is the ally of these hams. Iberian ham artisans monitor the meat, making adjustments based on detailed observations and a wealth of knowledge. Each is aged in a minimum of 48 months.

GOLFERA NOBILI SAPORI

Golfera is located in the ancient village of Lavezzola in Italy’s Emilia-Romagna region. Lavezzola has always embodied a long-standing bond between food and landscape and is famous for traditional Italian charcuterie. The phrase “new products with traditional flavor” effectively expresses what Golfera is all about: quality mortadella and hams that are new in their manufacturing yet traditional in flavor, texture and fragrance. The use of modern production technology and unsurpassable standards of hygiene have only enhanced the traditional cultural ways in which their meats are prepared.

Golfera maintains complete control over their production chain. This starts with animal welfare, humane feeding and breeding and no antibiotic use after the third month of an animal’s life. Their mortadellas and cooked hams are made with genuine “clean” labels, meaning free of dairy, gluten, monosodium glutamate, nitrates and nitrites. The mortadella’s pistachios are Sicilian and the black truffle is from Bologna, both ingredients strictly Italian sourced. Likewise, Golfera uses only fresh, high quality cuts of shoulder meat (no tripe or lesser cuts), fat from the neck of the animal, and warm spices to achieve superior taste.

PASTIFICIO GENTILE PASTA

Established in 1876, Pastificio Gentile is one of the historic artisanal factories that made the city of Gragnano famous around the world for its pasta. Today, Gentile preserves the traditional production methods and the attention to every detail from selection of raw materials to the production processes. The semolina chosen is strictly of Italian origin and of the best quality. Among the selected wheat varieties is the renowned Senatore Cappelli. All wheat used in Pastificio Gentile pasta is single-sourced and processed with care and respect at the Ferro Brothers Mill in Campobasso (in the Molise region of southern Italy). The excellent raw material allows for the production of a premium quality pasta and the low temperature drying method known as ‘Cirillo’ preserves its distinct aroma and texture.

Each of Pastificio Gentile’s pasta shapes are bronze cut, meaning that the molds or “dies” used in production are made of bronze. The bronze mold creates a rougher more porous pasta giving the pasta a homemade quality. As a result, sauces and seasonings do not slide off of the pasta as they would with a smoother type.

ORGANIC CUTS

Nine organic cuts—two are whole wheat—made using the best of Southern Italy’s wheat, the “Cirillo” drying method, and bronze molds to create a homemade quality dry pasta that holds its sauce.

LES MOULINS MAHJOUB ORGANIC OLIVES

SOFI Silver Outstanding Product Line 2002, 2009

The Mahjoub family farms the soil in the lush Mejerda Valley of Tunisia located on the southern shores of the Mediterranean. It is here that they produce handcrafted products under the Les Moulins Mahjoub label and are known for their steadfast commitment to artisan standards and sustainable farming. The Mahjoubs are recognized in the culinary world as a premier producer of extra virgin olive oils, table olives, and condiments, never using additives or artificial processes.

These all natural organic olives are cured using two ingredients: salt and time. Lye or citrus are never used in the curing process. These olive varieties are native to Tunisia. The green Meski variety is known for its meaty flesh. To preserve the integrity of the fruit during the debittering process, the Mahjoubs carefully open each olive with a small, handmade incision instead of crushing. The black Sahli variety is tiny and dark violet in color. The olives are placed in a natural brine and allowed to soak for about 9 months, producing a cured olive with a rich, buttery flavor.

SERVING SUGGESTIONS
Fruit and spice flavors add an exciting element to any cheese plate. A good rule of thumb: Pair bolder, more complex flavors to accentuate and compliment softer ones. Candied Lemon & Fig Chutney pairs beautifully with Cumbre de Trujillo (p. 21) or Tuada (p. 27). Stronger cheeses like Gorgonzola (p. 30) or Taleggio (p. 30) pair well with Fig or Mulberry Jams.
The small French fishing village of Collioure has been renowned for their anchovies since medieval times. Today, the Roque family is one of two families left producing anchovies in an extremely labor intensive process. Fresh fish are sorted by hand and packed in salt barrels for approximately three months. Then they are removed, beheaded, and gutted by hand, repacked in salt, and transferred to a cool warehouse for 3-12 months. Each fillet is individually layered in glass jars to preserve the integrity of the fillet. Ingredients used in production of Roque anchovy products, including the sunflower oil, vinegar and sea salt, are sourced in France. Roque believes the origin and tradition of these ingredients are important in upholding their high quality standards.

Acutely sensitive to the environment, the Marqués’ family produces a honey easy on the digestion that has been used for centuries as a basic ingredient in the healthy, Mediterranean diet. Since a bee travels no more than about 3 km from its hive, the beekeepers know the honey is sourced from the Marqués’ properties.

GUALTAMINOS PIMENTÓN DE LA VERA DOC

Members of the Gualtaminos Cooperative produce three kinds of Spanish paprika: pimentón dulce (sweet), agridulce (bittersweet), and picante (hot) in the valley of La Vera in Extremadura, Spain. All processing of pepper into pimentón is done by traditional methods. The individuality of pimentón de la Vera is owed to the traditional drying system in drying houses made with sun-dried earth or rocks. The slow burning process lasts 15 days, guaranteeing a 15% maximum moisture content when the drying process has finished, creating a long-lasting light smoky taste, distinctive aroma and vibrant color.

HALEN MÔN SEA SALT

British “Great Taste” Gold Award by Guild of Fine Foods 2013

Today, their salt is produced in Angelsey in a newly built salt cote (traditional salt factory). Pure sparkling sea water is naturally filtered over mussel beds. When the salinity levels are right, it is pumped (with permission by the Queen) a few yards to the salt cote and harvested by hand. Crunchy, crisp and so pure you detect sweet notes on the finish, it was voted outstanding product by Feria de Gastronomia and is loved by chefs and home cooks worldwide.
