

# GRAPEFRUIT MARMALADE

## LES MOULINS MAHJOUB

*Tunisia*

### SENSORY PROFILE

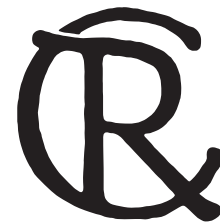

Warm Mediterranean sun nurtures the citrus of Tunisia and produces concentrated and beautifully fragrant fruit like the grapefruit used in this product. The marmalades from Les Moulins Mahjoub are subtly sweet and more fruit forward than their American counterparts, which translates into less sugar being added. This marmalade is perfect for breakfast or as an accompaniment with cheese. As with all of the Mahjoub products, this is produced using traditional farming methods with no additives or artificial processes.

### TRADITION

The Mahjoub family farms the soil in the lush Mejerda Valley of Tunisia, located on the southern shores of the Mediterranean. It is here that they produce handcrafted products under the Les Moulins Mahjoub label and are known for their steadfast commitment to artisan standards and sustainable farming. The Mahjoub family is recognized in the culinary world as one of the premier producers of extra virgin olive oils, table olives, and condiments.
