### TRADITION

Fermin is a revered and sought after producer of traditional Spanish sausages and pork products. Fermin delicacies are made using traditional methods from free roaming Iberico pigs which are indigenous to the Iberian Peninsula, and from Spanish born and bred Serrano pigs. The unique microclimate imparts the characteristic aroma and flavor that Fermin has become world renowned for.

Fermin was started in 1956 by Fermin Martín and his wife Victoria Gómez. They gathered together the traditional knowledge of how to raise and mature the best Ibérico products. Fermin helped generate a flourishing industry for both the family and the entire region. Fermin has become a clear standard of reference in Spain's Ibérico pig products.
